## **West Star Aviation Installs First Rockwell Collins Pro Line 21 Upgrade on Falcon 2000**

**East Alton, IL, June 1, 2011** – West Star Aviation recently installed the first Rockwell Collins Pro Line 4 to Pro Line 21 Upgrade on the Falcon 2000. The upgrade is now available for Pro Line 4-equipped Falcon 2000 and 2000EX aircraft.

The project was completed at the West Star Aviation East Alton, IL location. This upgrade replaces the existing Cathode Ray Tube (CRT), displays with new Liquid Crystal displays (LCD). The new 8X10 inch displays are capable of displaying charts, maps, cameras and graphical weather. Operators may also upgrade the GPS sensors with WAAS for LP/LPV capability.

“These upgrades will enhance both the functionality and the value of the aircraft,” says Marty Rhine, Avionics Sales Manager, West Star Aviation. “We know customers will be extremely impressed when they take advantage of these upgrades.”

West Star Aviation, Inc. specializes in the repair and maintenance of airframes, windows, and engines, as well as major modifications, avionics installation and repair, interior refurbishment, surplus avionics sales, accessory services, paint and parts.

In addition to its facilities in East Alton, IL; Grand Junction, CO; Columbia, SC; and Dallas, TX, West Star Aviation runs the maintenance operations at Aspen-Pitkin County Airport located in Aspen, CO. The company also provides complete FBO services for transient aircraft at its newly remodeled East Alton and Grand Junction facilities. West Star Aviation, Inc. is an industry leader in technical experience and expertise while providing world-class customer services in all the organization’s divisions.
