WEST STAR AVIATION OFFERS LEARJET R-134a AIR CONDITIONER
SYSTEM CONVERSION

Grand Junction, CO, November 9, 2011 – Learjet recently released Advisory Wire AW21-008 stating they will no longer support the R-12 air conditioning systems on Learjet 20/30/50 and 60 series aircraft and they are sanctioning the Steinbach R-134a installation. However, West Star Aviation can install the Steinbach & Associates STC conversion kits for the R12 Air Conditioning systems at their Grand Junction, CO facility, and their certified mechanics have experience installing these kits on all of the affected Learjet models. To view the complete Advisory Wire AW21-008 visit <http://www.cic.bombardier.com>.

The air conditioning STC converts the R-12 system to the ozone-friendly R-134a Suva refrigerant system for all applicable Learjet aircraft. This includes EASA STC IM.A.S00284 for operators in that environment.

The conversion kits include an R-134a compressor, expansion valves specifically for R-134a, compatible receiver-dryer, and Teflon vapor barrier hoses and fittings along with servicing ports specifically for R-134a. West Star's technical support staff encourages all interested Learjet operators to contact maintenance sales personnel in advance to avoid adverse scheduling or operational impact. For more information about installing the Steinbach & Associates conversion kit, contact Emily Mason, 970-261-1308.

West Star Aviation, Inc. specializes in the repair and maintenance of airframes, windows, and engines, as well as major modifications, avionics installation and repair, interior refurbishment, surplus avionics sales, accessory services, paint and parts.

In addition to its facilities in East Alton, IL; Grand Junction, CO; Columbia, SC; and Dallas, TX, West Star Aviation runs the maintenance operations at Aspen-Pitkin County Airport in Aspen, CO and at Spirit of St. Louis Airport in Chesterfield, MO. The company also provides complete FBO services for transient aircraft at its newly remodeled East Alton and Grand Junction facilities. West Star Aviation, Inc. is an industry leader in technical experience and expertise while providing world-class customer services in all the organization's divisions. For more information visit <http://www.weststaraviation.com> or call 800-922-2421.
