**WEST STAR AVIATION To Increase Accessory Capabilities At
Two Locations**

Columbia, South Carolina (CAE) and East Alton, IL (ALN) opening new accessory shops

Columbia, South Carolina, October 21, 2014—West Star Aviation recently added accessory shop capabilities at their Columbia, South Carolina (CAE) location. The new shop became fully operational in April 2014. In addition, West Star will open another all new accessory shop at their East Alton, IL (ALN) location during the 4th quarter of 2014.

The new CAE shop offers the following services: Starter-generator repair/overhaul and testing, Learjet components repair, inspection and overhaul, King Air landing gear inspection and overhaul, full non-destructive testing (NTD) capabilities for magnetic particle inspection, and welding for aluminum, stainless steel, and all nickel alloys. In addition, the new accessory shop offers capacity testing for batteries, nickel cadmium, lead acid, sealed lead acid, as well as repair and testing for emergency power supplies.

“The accessory shop at CAE has already been very successful in serving our clients in the area,” said Rodger Renaud, COO, West Star Aviation. “Adding the capabilities at ALN will allow us to further meet our customers’ needs no matter where they are located.”

Once operational, the new ALN shop will focus on providing extensive services for aircraft wheels, adding battery capabilities before the end of 2014. Moving forward, ALN plans to expand their offerings to include brakes services as well.

The West Star Aviation facility located in Grand Junction, CO (GJT) also offers a wide range of repair and overhaul capabilities in their full service accessory shop.
